

TITANOS

PRIVATE WEALTH OPERATING SYSTEM

titanosdemo.vercel.app · hello@titanos.com

THE NAME

TitanOS is the platform. It is written as one word, capital T and capital OS — not Titan OS, not TitanOs, not TITANOS. The tagline is set in capitals and is never re-punctuated.

TitanOS is white-label. A licensed firm's clients see that firm's name, logo and palette — never these. This sheet is for the platform's own materials: the site, decks, contracts and anything addressed to a prospective firm. If a client of a licensed firm can see it, it carries their brand, not this one.

MARKS

TITANOS

Full lockup

Light backgrounds. The default.

TITANOS

Knockout

On navy or any dark field.

Mark alone

Favicons, avatars, tight spaces.

Leave clear space around the lockup of at least the height of the mark. Never stretch, rotate, recolour or add effects. On a photograph, use the knockout over a solid navy panel rather than placing it on the image directly.

PALETTE

	Navy	#092B49	Primary. Headings, body text, filled buttons.	14.45:1 on white
	Navy mid	#293D5C	Secondary text, subheads, chart series.	10.96:1 on white
	Gold	#CEB684	Accent only. Rules, panels, top borders.	1.97:1 on white text: reverse only
	Gold light	#DFC99A	Panel fills behind navy text.	surface
	Cream	#F9F7F3	Page background.	surface
	Border	#D8CDB8	Dividers, input outlines.	surface
	Border light	#EDE8DE	Hairlines inside cards.	surface
	Text soft	#5A6E84	Supporting copy.	5.25:1 on white
	Text mute	#8FA0B2	Captions and metadata only.	2.68:1 on white text: reverse only

Gold is not a text colour

Gold measures 1.97:1 on white — far below the 4.5:1 needed for body text, and unreadable on a projector. Use it for rules, top borders and panel fills. It carries text only in reverse, where it reaches 7.33:1 on navy. When an accent must appear as text on a light background, darken it toward navy first.

TYPOGRAPHY

Cormorant Garamond Headings, figures, the wordmark. Semibold 600.

DM Sans Body, labels, tables, buttons. Regular 400 and medium 500.

Sentence case for headings and labels. Capitals are reserved for the tagline and for small eyebrow labels. Never set body copy in the serif, and never set a heading below 13pt — if it needs to be smaller, it is a label, not a heading.

VOICE

Plain, specific, unhurried. The product's job is to make a firm look organised, so the writing states what happened and what it cost — no superlatives, no “seamless” or “elevate”, no exclamation marks. Say the number and where it came from. Where something is not known, say that rather than rounding it into confidence.
