

Onboarding a new household

Once, when a household is taken on. Expect it to span more than one sitting.

HOUSEHOLD

TITAN EXPERT

COMPLETED BY

DATE

THE RECORD ITSELF

Household created and the responsible Titan Expert set before anything else is added.

Members added, with dates of birth where they matter for planning.

One member designated PRIMARY with the star.

The primary member has an email address on file.

Professional contacts added: accountant, attorney, banker, insurance broker.

Contacts the household should be able to email themselves are ticked as such.

Counterparties recorded — bankers, trustees, carriers, fund administrators — so correspondence to them is recognised rather than queried.

ASSETS AND OBLIGATIONS

Properties created with loan, tax, insurance, flood and tenancy detail.

A document attached to each property section that should have one.

Property vendors recorded with phone and email.

Portfolio accounts created with institution, type and banker.

Most recent statement filed against each account and a dated balance recorded, so no account reads "no date on this figure".

Valuables recorded and linked to the schedule covering them; anything uninsured is uninsured deliberately, not by omission.

Cash flow events entered, including anything the firm pays on the household's behalf.

Recurring obligations recorded, with their conditional questions answered from the trust document or the client's instruction rather than assumed.

ACCESS

Client portal user created for the household and sign-in confirmed.

Partner grants set for any outside adviser who needs sight of this household.

Signed in as the responsible Expert and confirmed this household appears and no other Expert's client does.

NOTES, EXCEPTIONS AND ANYTHING DELIBERATELY LEFT UNDONE

An item left unticked is a decision, not an oversight. Record why here.
