Advisor User Guide

PCM Family Office Platform

For internal advisor & admin use

Table of Contents

1. Getting Started

The PCM Family Office Platform is organized around three roles: Admin, Advisor, and Client. This guide covers the Advisor experience — the day-to-day workspace for managing families, prospects, tasks, and client-facing documents.

Logging In

Sign in with the email and password provided by your administrator. If you don't yet have an account, ask an Admin to create one for you from Users (Admin section).

Roles at a Glance

Field / Item	What It Does
Admin	Full access to every family, prospect, and the Users tab. Can reassign advisors and manage accounts.
Advisor	Sees families and prospects assigned to them. Full access to Client Management, Prospecting, and Resources.
Client	Read-only portal scoped to their own family — a separate, simplified dashboard covered in the Client Guide, not this document.
Note	Clients never see the advisor navigation — they're routed to a dedicated Client Dashboard automatically at login.

2. Dashboard

Your home screen on login. Shows firm-wide summary stats — families, real estate, portfolio totals, and open tasks — plus an Upcoming Deadlines feed pulling from every family: task due dates, loan maturities, insurance expirations, deal close dates, birthdays, and anniversaries.

- Overdue tasks and items due soon are flagged with colored banners at the top.
- Admins can filter dashboard stats by advisor using the scope bar.

3. Client Management

Families

Your list of active client families. Click into a family to reach its full dashboard: Summary, Portfolio, Properties, Cash Flow, Valuables, Tasks, Documents, and the family's AI assistant.

Field / Item	What It Does
Properties	Real estate and other titled assets — including vehicles, boats, and planes — with mortgage, insurance, and valuation detail.
Portfolio	Investment, retirement, and bank accounts with balances and performance.
Cash Flow	Income/expense modeling with current-year tax brackets and a state-relocation comparison tool.
Documents	Secure storage with AI-assisted scanning (✦ Scan) for text extraction and search on uploaded PDFs.
Ask [Assistant Name]	The family's private AI assistant — each family can name theirs on first login.

Portfolio, Notes & Tasks (Client Management)

These tabs mirror the family-level views but roll up across every family at once, so you can triage notes or tasks firm-wide without opening each family individually.

4. Prospecting

A separate pipeline for people who aren't yet clients. Contacts, Notes, and Tasks here work the same way as Client Management, scoped to prospects instead of families.

Pipeline

Track prospects through stages: Lead, Qualified, Proposal, Negotiation, Closed Won, or Closed Lost. Advisors see their own prospects; Admins can view and filter by advisor.

Tip

When a prospect converts, move their deal to Closed Won and set up their family record in Client Management — the Resources tab can then generate their Client Services Agreement and Auto-Debit Authorization.

5. Resources

A dedicated advisor/admin-only tab for generating client paperwork and reaching common tools without leaving the platform.

Client Documents

Select a family from the dropdown, then choose a document to generate:

Field / Item	What It Does
Client Services Agreement	The \$5,000/month advisory agreement with a 6-month minimum commitment. Pre-fills the client's name and address; you confirm the effective date and governing state before generating.
Auto-Debit (ACH) Authorization	Recurring monthly fee authorization. Pre-fills client and contact details; the \$5,000.00 monthly fee is pre-set but editable.

Both are generated entirely in your browser and open in a new tab as ready-to-sign, fillable PDFs — nothing is uploaded to a server in the process.

Tools & Documents

A grid of reference material and blank fillable templates advisors use often:

- Advisor User Guide — this document
- Client Data Completeness Checklist — audit checklist for onboarding and periodic reviews
- Wire Transfer Instructions — fillable remittance form
- Personal Financial Statement — fillable assets, liabilities, income & expense statement
- Lifestyle Expense Worksheet — fillable monthly/annual expense worksheet for clients

Note

These open as blank templates for any client situation — they are not pre-filled from a family record the way the Client Services Agreement and ACH Authorization are.

6. Admin (Admin Role Only)

Admins have an additional Users tab to create accounts, assign roles and families, and activate or deactivate access.

Field / Item	What It Does
Add User	Create a login for a new advisor, admin, or client and assign a family (for clients).
Change Role	Promote or adjust a user's role between Client, Advisor, and Admin.
Deactivate	Revoke access without deleting the account or its history.

7. Tips & Troubleshooting

- Data not saving? Confirm required fields are filled — some writes fail silently if a field is left blank.
- Can't find a family or prospect? Check whether you're in Client Management vs. Prospecting — they're separate lists.
- Document won't open? Pop-up blockers can prevent new tabs — allow pop-ups for this site if a generated PDF doesn't appear.
- Need something added to Resources? Ask your Admin — the Tools & Documents grid is easy to extend with new templates.
